

Hour of Code Coming to FSK

December 3 – 7, 2018

Do you have a love for computers? Are you interested in computer science? Have you ever wondered how games/apps on your phone, tablet or computer were designed/work? Then sign-up for an “Hour of Code”. During this session, you will make connections between computer science and the real world by learning to program droids, and create your own Star Wars game in a galaxy far, far, away. For more information about the Hour of Code, see Ms. Patterson or Ms. Naugel.
